Andi Basha

JavaScript Engineer, Prishtina, Kosovo

andi.basha@gmail.com linkedin.com/in/andibasha github.com/andib0 andib0.github.io/portfolio

Summary

JavaScript engineer with a background in React Native and full-stack web work, currently building A/B tests and personalisation experiments for high-traffic e-commerce storefronts. On the side I build small, local-first apps with Rust and React Native.

Experience

Web Developer @ Sogody

Jan 2026 - Present

- Build A/B tests & personalisation campaigns for high-traffic e-commerce storefronts
- Write variant code in vanilla JavaScript & CSS, shipped through Adobe Target & Insider
- Set up audiences, targeting rules & analytics tracking for every experiment
- QA each variant across browsers & devices before launch, with screenshot evidence

Field Engineer @ Unicare

Aug 2025 - Nov 2025

- Field work for a medical device servicing company, at hospitals & clinics
- Now building its field-service platform as a client project: job scheduling, device records & stock
- Mobile apps in React Native (Expo) & a React admin panel, on Supabase & PostgreSQL

Software Engineer @ Pabau

May 2025 - Jul 2025

- Developed full-stack features for the Pabau clinic software platform
- Worked with React, GraphQL & Apollo across front-end & back-end
- Collaborated with cross-functional teams to track down issues & ship scalable fixes

React Native Developer @ Innovative Solutions

Apr 2023 - Oct 2024

- Developed new features & optimized existing apps
- Integrated REST & GraphQL APIs for data management
- Collaborated with UX/UI & backend teams on scalable architectures
- Monitored performance using Firebase, Sentry
- Worked with Zustand, React Hook Form, TanStack Query, & i18next
- Version control with Git including branching strategies & code reviews

Earlier

Database Officer @ Central Election Commission — Jul 2021 - Dec 2021

Office Administrator @ NightDesign Studio — Jun 2017 - Mar 2019

Projects

Glint Windows tray app for DDC/CI monitor control, in Rust on raw Win32 — github.com/andib0/glint

Onyx Local-first training & nutrition planner: Expo app, Express API — github.com/andib0/onyx

Moneywort Local-first Android finance app in Rust, Tauri 2 & Svelte 5 — github.com/andib0/moneywort

Skills

Code	JavaScript (ES6+), TypeScript, Rust, SQL, HTML & CSS
Web & mobile	React, Next.js, React Native, Expo, Svelte, Tauri
Experimentation	A/B testing, Adobe Target, Insider, Adobe Analytics
Backend & data	Node.js, Express, GraphQL, Prisma, PostgreSQL, SQLite
Tooling	Git, TanStack Query, Zustand, Playwright, Sentry
Languages	Albanian (native), English (fluent)

Education

Computer Science and Engineering UBT, University for Business and Technology, Prishtina

Courses

Red Teaming Certified Professional Findbug — 2024

Mobile App Development Bootcamp UNDP, GIZ & Cactus — 2023

Advanced JavaScript & React Povio Engineering Academy — 2022
